Profile

Senior frontend engineer building web products since 2006. I combine hands-on Vue, Nuxt and TypeScript development with product thinking, UX, design systems, testing and technical leadership. My career spans frontend development, team leadership, product ownership and staff-level engineering across e-commerce, sports technology and digital health.

Core expertise

Frontend engineering

Vue, Nuxt, TypeScript, JavaScript, Pinia/Vuex, HTML, CSS, SCSS, Tailwind CSS and REST API integration

Architecture and quality

Component systems, design systems, Storybook, accessibility, Playwright, Jest, unit and integration testing, performance and SEO-aware implementation

Product and UX

Product discovery, requirements analysis, UX audits, information architecture, rapid prototyping, roadmaps, backlog refinement and delivery trade-offs

Technical leadership

Architecture decisions, mentoring, recruitment, onboarding, one-to-one meetings, workshops, Scrum/Kanban facilitation and cross-functional communication

Additional experience · Angular, React, jQuery, Webpack, GraphQL, NestJS, Node and Supabase

Professional experience

Everli

May 2019 — Present

Frontend Developer → Senior Frontend Engineer → Staff Frontend Engineer

International e-commerce product · formerly Supermercato24

Joined Everli to help replace the customer-facing Angular application with a Vue SPA. Progressed from Frontend Developer through Senior Frontend Engineer to Staff Frontend Engineer as the role expanded across architecture, product collaboration, quality, design-system work and team support.

- Build and evolve customer-facing e-commerce journeys with Vue, Nuxt, TypeScript and REST APIs.
- Contributed to the Angular-to-Vue migration and the later evolution towards Nuxt and TypeScript.
- Work with product, design, backend and business stakeholders to clarify complex requirements and delivery trade-offs.
- Contribute to shared frontend architecture, reusable components, the internal design system and UI library.
- Build and maintain Playwright, unit and integration coverage for critical flows and contribute to accessibility initiatives.
- Mentor developers, support recruitment and onboarding, run workshops and provide hands-on technical support.

Vue · Nuxt · TypeScript · JavaScript · Pinia/Vuex · Tailwind CSS · Playwright · Jest · REST APIs · Design systems · Accessibility

E-Net Production

October 2017 — April 2019

Product Owner / Frontend Team Lead

Katowice, Poland

Defined the product vision for a UI component system and a no-code landing-page editor while leading the frontend team and staying close to implementation.

- Owned the product backlog, milestones and roadmap.
- Facilitated backlog refinement, planning and Agile practices and approved feature and sprint outcomes.
- Balanced business priorities, technical debt and implementation constraints while supporting the team as product owner and frontend technical lead.

Pepper.com

August 2017 — October 2017

Frontend Developer

Berlin / remote

Built Vue components and UI elements for an Angular-based administration panel while collaborating with an international remote team.

Professional experience · continued

E-Net Production

April 2009 — August 2017

Frontend Developer → Senior Engineer → Frontend Team Lead

Katowice, Poland

Progressed from UI and e-commerce template delivery into senior frontend engineering and team leadership, helping shape the company’s frontend systems, interface quality and team practices.

- Designed and implemented e-commerce interfaces and reusable HTML, CSS and JavaScript templates.
- Helped create internal frontend frameworks, component systems and reusable delivery foundations.
- Mentored frontend developers and designers and supported recruitment, onboarding and development plans.
- Led Agile ceremonies, improved delivery processes and remained hands-on in technical problem-solving.

Elamed

January 2009 — March 2009

Frontend Developer Intern

Katowice, Poland

Created UI designs, HTML/CSS/JavaScript templates and Django/Smarty themes for a custom CMS; first professional use of SVN.

Webheart

June 2008 — November 2008

UI Designer / Junior Frontend Developer

Katowice, Poland

Created UI designs, frontend templates and Joomla themes.

Drazewski Design

October 2006 — December 2014

Freelance UI Designer / Frontend Developer

Parallel freelance practice

Delivered more than 40 projects for clients and agencies across Poland, Norway, the Netherlands and England, covering UI design, HTML/CSS/JavaScript, WordPress, estimation and client communication.

Selected consulting

Montage.app

May 2026

UX/UI Consultant

Reviewed an early-stage product, identified usability and interaction problems and translated the findings into prioritised, technically feasible redesign directions.

Teldoc

2024 — 2025

Frontend & UX Consultant

Audited and redesigned the public website, implemented the frontend and facilitated product discussions for new digital-health experiences.

Selected products

Elevenrate

Football performance and player-tracking product. Responsible for product definition, UX/UI, Nuxt/Vue frontend architecture, TypeScript server logic, data modelling, integrations, analytics, testing, SEO and deployment.

Nuxt · Vue · TypeScript · Supabase · Playwright · Football-data integrations

Navidoo

Family and child-development product designed around responsible communication, privacy and age-appropriate context. Responsible for product definition, UX/UI, full-stack TypeScript development, authentication, data architecture, AI integration, testing and deployment.

Nuxt · Vue · TypeScript · Supabase · Authentication · AI integrations · Playwright

Education

2006 — 2008 Master’s degree in Computer Science

University of Silesia in Katowice, Poland

2002 — 2006 Bachelor’s degree in Physics

University of Silesia in Katowice, Poland

Outside work · Family, running, basketball, football, volleyball, books, film and music production.
